Professional Summary

Pre-final year Information Technology student focused on full-stack development, backend development, and AI/ML. Experienced in building web applications and REST APIs using Java, Spring Boot, React.js, and Firebase. Worked on projects involving multilingual NLP and AI-based emergency response systems, with a focus on building practical software solutions and continuously improving my development skills.

Technical Skills

Programming Languages: Java, Python, R, SQL, C, C++
Frontend: React.js, Next.js, HTML5, CSS3, JavaScript, Bootstrap
Backend: Spring Boot, FastAPI, Flask, Servlets, REST APIs
AI/ML: XLM-RoBERTa, NLP, LangChain, RAG, NumPy, Pandas
Databases: MySQL, MongoDB, Firebase, Supabase, Oracle
Cloud & Tools: AWS, Git, GitHub, Postman, VS Code, Jupyter, Google Colab
Core Concepts: OOP, Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks

Projects

ALERT-GOVERNMENT

[GitHub Repository](#)

AI-Powered Government Emergency Alert Management System Java, Spring Boot, MySQL, Bootstrap, Google Maps API

- Designed a government emergency alert management system with role-based access and a hierarchical alert verification and approval workflow.
- Developed a workflow for location-based emergency management, map-based area selection, mobile tower coverage visualization, and multilingual alert generation.
- Designed modules for emergency dashboards, alert history, administrative monitoring, and Cell Broadcast request workflows.

CLAF-Net: Cross-Lingual Asymmetric Focal Network

[GitHub Repository](#)

Research Paper: Zero-Shot Disaster Response Classification Python, PyTorch, Hugging Face, XLM-RoBERTa

- Co-authored a research paper proposing a multilingual, multi-label disaster-message classification framework for English, Haitian Creole, Spanish, and Urdu.
- Combined XLM-RoBERTa, Context Fusion augmentation, and Asymmetric Focal Loss to address translation latency and imbalanced disaster categories.
- Reported a Macro F1 score of 0.68 and 45 ms inference latency, compared with 0.42 Macro F1 for the XLM-R BCE baseline and 450 ms latency for the translation-based BERT pipeline in the paper's experiments.

Education

Karpagam College of Engineering, Coimbatore

B.Tech. in Information Technology

Sep 2024 – Present

CGPA: 7.73/10.0

SRV Innovative Public School (CBSE), Namakkal

Senior Secondary Education

Jun 2021 – Mar 2023

Percentage: 67.0%

Om Shanthi Higher Secondary School (CBSE), Dindigul

Higher Secondary Education

Jun 2020 – Mar 2021

Percentage: 62.0%

Achievements & Certifications

- Solved 150+ Data Structures and Algorithms problems on LeetCode, (ongoing)
- NPTEL: Soft Skill Development, Mar 2025
- NPTEL: Introduction to Internet of Things, Apr 2026
- Meta Full Stack Developer: Front-End & Back-End from Scratch Specialization — Coursera, Jul 2026
- CCNA: Switching, Routing, and Wireless Essentials — Cisco Networking Academy, Sep 2026
- CCNA: Introduction to Networks — Cisco Networking Academy, Sep 2026
- Completed 22+ Front-End and Software Development courses through LinkedIn Learning, Sep 2026
